Overview

> I am endlessly curious and always ready for a new challenge.

Front-end developer with some full stack chops. Strong experience with React, Redux, Ember, Rails, Node and Sass. Also experienced with data visualization and building APIs.

I am focused on becoming the best JavaScript engineer I can be. I want to work on a team that is building and shipping useful tools and products.

Skills

- Strong front-end developer: HTML & templating languages, component-based architecture, CSS/Sass/PostCSS, JavaScript/ES6 and more
- Solid experience with React, Redux, Ember, Rails, Node, and MySQL on production-level projects.
- Some experience with RxJS and Elm
- Experience with Test Driven Development
- Experience with Git and SVN version control, code reviews, pull requests, pair programming and more
- Creator and maintainer of several NPM pagckages and Ruby gems
- Contributor to several open source projects and seeking more opportunities to contribute
- Highly skilled in creating front-end systems that are responsive, mobile-first, cross browser compatible applications
- Code is always well-documented, styleguides always followed, and kept clean for the next developer on the project
- Excellent communicator and teacher; Able to facilitate dialogue across disciplines

Work

Second Story - Portland, OR - September 2016 to Present Web and Interactive Developer

- Front end JavaScript developer building React & Redux applications for web and digital interactives

- Built company's new brand site as an universally rendered React/Redux application
- Currently building a multi-user, multi-touch interactive with React, Redux, RxJS and WebSockets

FINE - Portland, OR - November 2013 to June 2016 Front End Web Developer

- Front End Developer and Tech Lead for numerous projects. Crafted templates and views, built CSS/Sass from the ground up, scaffolded models, wired controllers, and wrote all JavaScript from start to finish
- Sole developer on several projects. Full stack Ruby on Rails development.
- Initiated and crafted front end standards for company.
- Developed and contributed to company's open source projects.
- Built internal tools and processes to maximize personal and team efficiency and increase developer happiness.

Education

MA in Theology (Yes, you're reading that correctly. I'm a theologian turned programmer) Fuller Theoglogical Seminary - Pasadena, CA - 2012

BA in Philosophy & Mathematics Lenoir-Rhyne University - Hickory, NC - 2007

Noteworthy Repos

Shevy A typography/vertical rhythm Sass library. Demo

ShevyJS A port of Shevy to JavaScript; built specifically for CSS-in-JS systems.

Matchbox A vanilla JavaScript plugin for... well... matching the height of boxes. Demo

Componentize Rails generator for inline and block components; similar to Ember-CLI's component generator

Condo A micro Sass grid library. Demo

Ripsum Ruby gem for generating random amounts of lorem ipsum with each page load. Demo

Open Source Projects I Contribute To

React DevTools (pending PR) An extension that allows inspection of React component heirarchy.

ShipShapeCode / Ember-3d-Nav Ember addon for a simple, yet configurable, 3d navigation

Rails API / Active Model Serializers ActiveModel::Serializer implementation and Rails hooks

WeAreFINE / FAE A flexible CMS for Rails

WeAreFINE / Frob Core A framework for front (frob) enders (tenders) everywhere
